TRANSFERRED WATER RIGHTS

<u>Move-to Location</u>	OSE Permit	PRIORITY DATE
CHRU-004-0050A (Unser LLC)	No. 1545 & 1699 into 4888 & 4889	December 4, 1922

You are hereby notified that the Court has entered an order requiring you to file an objection with the Court if you disagree with the State's proposed determination of the priority date of your water right and ditch, or the priority dates for any other community or private ditch in the Rutheron & Plaza Blanca Subsection of Section 7 of the Rio Chama Stream System ("Rutheron & Plaza Blanca Subsection") as described above. The priority dates for the ditches listed above will apply to all individual irrigation water rights served by the ditches listed, unless you or other persons file objections. The priority dates for ditches listed above will also apply to a spring that serves as a source of water for irrigators under those ditches, and which is described on individual subfile orders filed with the Court. Defendants that have previously agreed to a priority date for their water rights in the Rutheron & Plaza Blanca Subsection in subfile orders filed with the Court may not object to the dates of their own water rights, but may file objections to the proposed determination of the priority dates of other water users.

In addition, you are hereby notified that the Court has entered an order requiring you to file an objection with the Court if you disagree with the State's proposed determination of the irrigation

water requirements for surface water irrigation use in the Rutheron & Plaza Blanca Subsection for lands irrigated under pre-1907 ditches as described below:

- a. The weighted consumptive irrigation requirement (CIR) is 1.08 acre-feet per acre per annum.
- b. The farm delivery requirement (FDR) is 2.70 acre-feet per acre per annum.
- c. The project diversion requirement (PDR) is 4.50 acre-feet per acre per annum.

The ditches in the Rutheron & Plaza Blanca Subsection to which the above amounts apply are all of the ditches identified above with the exception of the Willow Creek Mesa Ditch.

You are hereby notified that you are required to file an objection with the Court if you disagree with the State's proposed determination of the irrigation water requirements for surface water irrigation use on lands in the Rutheron & Plaza Blanca Subsection that are irrigated under final licenses issued by the Office of the State Engineer, or irrigated under an approved permit for the transfer of water rights, as described below:

Willow Creek Mesa Ditch (OSE No. 1545 & 1699):

- a. The weighted consumptive irrigation requirement (CIR) is 1.08 acre-feet per acre per annum.
- b. The farm delivery requirement (FDR) is 1.5 acre-feet per acre per annum.
- c. The project diversion requirement (PDR) is 2.5 acre-feet per acre per annum.

TRANSFERRED WATER RIGHTS

<u>Move-to Location</u>	OSE Permit	AMOUNT OF WATER
CHRU-004-0050A	No. 1545 & 1699 into 4888 & 4889	23.67 acre-feet per annum consumptive use 40.35 acre-feet per annum diversion amount

The term "Consumptive Irrigation Requirement" ("CIR") refers to the quantity of water, expressed in acre-feet per acre per year, exclusive of effective precipitation, that is consumptively used by plants or is evaporated from the soil surface during one calendar year. The term "Farm Delivery Requirement" ("FDR") refers to the quantity of water expressed in acre-feet per acre per year, exclusive of effective precipitation, delivered to the farm headgate or which is diverted from a source of water which originates on the farm itself, such as a well or spring, necessary to satisfy the consumptive irrigation requirements of crops grown on a farm in one calendar year. The "Project Diversion Requirement" ("PDR") or off-farm diversion requirement is defined as the quantity of water, exclusive of effective precipitation, which is diverted from the stream or an off-farm source to satisfy

the farm delivery requirement for one calendar year. The irrigation water requirements set forth above do not include diversion requirements associated with stock ponds or other impoundments determined to have valid water rights in these proceedings.

If you agree with the priority dates and irrigation water requirements described above, you do not need to take any action. If any objections are filed by any persons you may participate in the proceedings to resolve those objections. If no objections are filed, the Court will enter an order that recognizes the elements of the water rights for surface water irrigation use in the Rutheron & Plaza Blanca Subsection as described above. If you disagree, you must follow the instructions below.

This will be your only opportunity in these proceedings to object to the determination of priority dates or irrigation water requirements in the Rutheron & Plaza Blanca Subsection. Subsequent *inter se* proceedings in the Rutheron & Plaza Blanca Subsection will not include the opportunity to object to those determinations.

IT IS THEREFORE ORDERED THAT if you object to any of the priority dates stated above, or to the irrigation water requirements for surface water irrigation use in the Rutheron & Plaza Blanca Subsection as stated above, you must file your objection with the Court, in person or by mail, **FOR RECEIPT NO LATER THAN June 1, 2012:**

United States District Court Clerk
333 Lomas Blvd. NW, Suite 270
Albuquerque, NM 87102

If you timely file an objection the Court will notify you of a mandatory scheduling and pretrial conference, where you will learn how objections will be heard by the Court. This will be your only opportunity to object to these elements of your water rights or any other water rights. If you fail to timely object and attend the scheduling and pretrial conference you may not raise objections in the future.

If you have any questions, call or write:

Edward G. Newville
Special Assistant Attorney General
